Features

- Constant Current mode output with multiple levels selectable by dip switch
- KNX/EIB protocol
- Flicker free design
- Support emergency lighting(EL)
- Integrated constant light output
- Integrated KNX push button interface
- · Synchronization up to 10 units
- Functions: Manual dim, operation hours, power consumption feedback, log/linear curve selection...etc
- 3 years warranty

Description

LCM-40KN series is a 40W AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch and the KNX interface to avoid using the complicated KNX-DALI gateway. LCM-40KN operates from $180 \sim 295$ VAC and offers different current levels ranging between 350mA and 1050mA. Thanks to the high efficiency up to 90%, with the fanless design, the entire series is able to operate for $-30^{\circ}C \sim +90^{\circ}C$ case temperature under free air convection. In addition, LCM-40KN is equipped with push dimming and synchronization so as to provide the optimal design flexibility for LED lighting system.

Туре	Function	Note
Blank	KNX and push dimming ,with standby power consumption <0.5W	In Stock
AUX	KNX and push dimming, with standby power consumption <1.2W and Auxiliary DC output	By request

LCM-40KN series

BLOCK DIAGRAM PFC fosc : 60KHz PWM fosc : 80KHz ○ +12Vaux RECTIFIERS (optional) EMI FILTER RECTIFIERS POWER 3 PFC • +V I/P O & FILTER & SWITCHING CIRCUIT CURRENT RECTIFIERS MCU CO KNX+ ١ 0.L.P. DETECTION PFC PWM CIRCUIT CONTROL CONTROL 0.T.P. 0.V.P.

DIP SWITCH TABLE

LCM-40KN is a multiple-stage constant current driver, selection of output current through DIP switch is exhibited below.

DIP S.W.	1	2	3	4	5	6	Max. LED voltage
350mA							100V
500mA	ON						80V
600mA	ON	ON					67V
700mA(factory default)	ON	ON	ON			ON	57V
900mA	ON	ON	ON	ON		ON	45V
1050mA	ON	ON	ON	ON	ON	ON	40V

More current options through DIP switch are exhibited below.

lo DIP S.W.	1	2	3	4	5	6	Max. LED voltage
450mA		ON					78V
550mA				ON			73V
650mA	ON				ON		62V
750mA	ON	ON			ON	ON	53V
800mA	ON	ON		ON		ON	50V
850mA	ON	ON	ON		ON	ON	47V
950mA	ON	ON		ON	ON	ON	42V

Note: The max. LED voltage connected at the output should be always less than the table above.

■ DIMMING OPERATION

℅ KNX interface

- Apply KNX Bus cable between KNX+ and KNX-
- The application program(database) can be downloaded via Online Catalogs from ETS or via http://www.meanwell.com/productCatalog.aspx

Parametrization options	Description
Switch functions	 Turn on brightness Dimming speed for turn on/off Switch telegram and status Switch on/off delay
Dimming	 Dimming speed for 0~100% Allow switch on via relative dimming Push dimming with AC inut port Block object for push dimming
Brightness value	 Dimming speed for transition brightness values Permit set switch on and off brightness via value Brightness value and status
Faultmessage	Lamp fault AC/DC input monitor fault messages
Other functions	 Reaction on KNX voltage failure/recovery Power-On level Dimming curve select(linear/log) Synchronous dimming output Block function(Block1&Block2) Staircase lighting function(multi-stage switch-off)
General function	Cyclic monitoring telegram(In operation)
8 Scenes	Recall and save via KNX with 8-bit telegram
Operating hours & CLO	 Operating hours counter Constant light out(5 scheduled divisions)
Power consumption feedback	Power consumption report

※ CONSTANT LIGHT OUTPUT

 \odot PUSH dimming

- · KNX bus need to be connected when using PUSH Dimming
- The detailed function of PUSH dimming, please refer to the database.
- The maximum length of the cable between the push button and driver is 20 meters.
- The mechanical push button can be connected only between the PUSH terminal, as displayed in the diagram, and AC/L (in brown or black); it will lead to short circuit if it is connected to AC/N.
- In case the PUSH dimming is set locally, up to 10 drivers can perform the PUSH dimming at the same time when utilizing one common push button.
- In case the PUSH dimming is set independently via ETS, the number of drivers is done through group address and determined by the ETS project designer.

\odot AC/DC input monitor

- · KNX bus need to be connected when using AC/DC input monitor
- The detailed function of AC/DC input monitor(emergency lighting), please refer to the database and instruction manual.

SYNCHRONIZATION OPERATION

- · Synchronization up to 10 drivers (1 master + 9 slaves)
- Dimming operating range : 6%~100%
- Sync cable length : < 5m
- Sync cable type : Flat cable
- Sync cable cross section area : 22 24 AWG (0.2~0.3mm²)

NOTE: Min. Dimming operating range depends on database setting.

■ TEMPERATURE COMPENSATION OPERATION

LCM-40KN have the built-in temperature compensation function; by connecting a temperature sensor (NTC resistor) between the +NTC /-NTC terminal of LCM-40KN and the detecting point on the lighting system or the surrounding environment, output current of LCM-40KN could be correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

© LCM-40KN can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the DIP switch.

◎ NTC reference:

NTC resistance	Output Current
220K	< 60 $^{\circ}$ C, 100% of the rated current (corresponds to the setting current level) > 60 $^{\circ}$ C, output current begins to reduce, please refer to the curve for details.
330K	< 70 $^{\circ}$ C, 100% of the rated current (corresponds to the setting current level) > 70 $^{\circ}$ C, output current begins to reduce, please refer to the curve for details.
470K	< 80° C, 100% of the rated current (corresponds to the setting current level) > 80° C, output current begins to reduce, please refer to the curve for details.

Notes: 1. MEAN WELL does not offer the NTC resistor and all the data above are measured by using THINKING TTC03 series. 2. If other brands of NTC resistor is applied, please check the temperature curve first.

© KNX control, dimming and synchronization function of the driver will be invalid when the "temperature compensation" function is in use.
